

Join us!

- Exert an influence by participating in the different activities of the Working Groups.
- Interact with like-minded individuals and enhance your professional network with direct access to the industry's key players.
- Access to information: EU legislation, directives and regulations; policy issues and market changes; news about the irrigation industry; European exhibitions and events.
- Contribute to the elaboration of European Taxonomy for a sustainable irrigation sector.
- Participate in EIA events: Online Irrigation Forums, annual General Assembly and Gatherings.
- Make your company visible on website, Irrigazette.com, social medias, publications.

 communication@irrigationeurope.eu

The EIA is moving forward with energy and ambition. We are welcoming many new members from across Europe, representing all parts of our sector - agriculture, landscaping, technology and services. This diversity makes us stronger, more innovative, and more visible. In recent months, our association has been active in Brussels and in the field: engaging on the EU Water Resilience Strategy and the Taxonomy, advancing our working groups, and creating new opportunities for cooperation. Everywhere, one message is clear - Europe needs smarter, data-driven and sustainable irrigation solutions to meet the challenges of water, climate, and food security. None of this would be possible without the people who give their time and expertise to the EIA.

Europe is listening. Now is the time for irrigation professionals to show how our solutions can secure water, food, and green spaces for the future.

Join us, add your voice, and help us shape a resilient water future for Europe.

EIA creates impact through its Working Groups

Our Members

Who are we?

The European Irrigation Association (EIA), registered in Brussels, is a non-profit organization, active since 1996, which represents irrigation professionals throughout Europe from the Agricultural and Landscape sectors. Our members are manufacturers, installers, contractors and distributors of irrigation equipment as well as researchers, designers and consultants. The EIA's aim is to be the leading voice of the Irrigation industry within EU institutions and committees, promoting best-practices and the transfer of the know-how in all matters of irrigation, water management and water sustainability.

WG1
Sustainability in Agriculture
Leader: Giulia Giuffrè, Irritec

This WG promotes sustainable development in agricultural irrigation, focusing on efficient water use, recycling practices, and standardized methods to measure savings in water, energy and fertilizers while improving yield.

Sub WG1
Plastic Recycling
Leader: Ido Raanan, Netafim

This group works to advance the responsible use and recycling of plastic materials in irrigation across the EU market.

Sub WG1
Taxonomy
Leader: Giusy Inferrera, Irritec

This group aims to strengthen the presence of the irrigation sector within the EU Taxonomy, ensuring irrigation is recognized as a legitimate sustainable activity.

WG2
Urban Landscape
Leader: Michael Fayaud, Urbasense

This WG promotes smart irrigation solutions in urban environments to improve quality of life and help mitigate urban heat islands.

Sub WG1 WRS
Leader: Axel Touja, Aliénor

This group supports the development of the EU Water Resilience Strategy, promoting water as a strategic resource and ensuring irrigation is represented in resilience and financing policies.

WG3
Training & Knowledge Transfer
Leader: Damir Cizmek, In-Aqua

This WG supports the exchange of advanced irrigation know-how, offering practical, manufacturer-neutral training for professionals.

Sub WG1
Wastewater Reuse
Leader: Bruno Molle, INRAE

This WG identifies technical and safety constraints in wastewater reuse projects, which differ significantly from conventional irrigation systems.
